

## Touchless Cashless™ Vending Machine

Add the Coke&Go Touchless Cashless™ device to your vending machine to digitize and transform the traditional vending experience. Complete installation in about 10 minutes.

### Coke&Go Touchless Cashless™ Vending lets Bottlers:

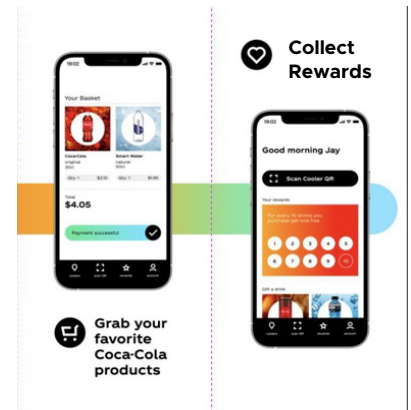

- Enable consumers to use their mobile device for contactless payments including credit cards, Apple Pay or Google Pay
- Enhance the consumer purchase experience by leveraging the Coke&Go consumer facing app
- Automatically transfer sales/DEX data from the vending machine to the bottler
- Enable technicians to use Android and or iOS apps to easily update planograms and pricing
- Gain real-time insights into the inventory at remote locations, prevent out of stocks and improve your inventory refill prediction strategy and driver efficiency
- Leverage the consumer's mobile device to transmit data -- no telemeter is required

### Easy to Use

1. Consumer scans QR code on vending machine
2. Register for Coke&Go app (first time only)
3. Select beverage(s) of choice
4. Confirm payment
5. Enjoy your beverage(s)

*\*\* Vending machine can also use a payment terminal for cash/credit card transactions if set-up by Bottler*
